POLYMER INJECTION TECHNOLOGY CERTIFICATE 2016/17

This is to certify that OneSteel Manufacturing produces
65%¹

of its reinforcing products using Polymer Injection
Technology which is recognised by the Green Building
Council of Australia as an Energy Reducing Process²

1. Average annualised figure for Green Star™ Rating Tool calculations

2. A lifecycle assessment of the Polymer Injection Technology (PIT) has been completed by the University of New South Wales and PE International and subsequently peer-reviewed by Life Cycle Strategies Pty Ltd. The Green Building Council of Australia has both these documents and recognises that PIT is an acceptable method of achieving their Energy Reducing Process requirement of 40MJ/tonne for the award of a credit point in the Green Star™ Rating Tool.
