

LIBERTY

POLYMER INJECTION TECHNOLOGY CERTIFICATE 2019

This is to certify that Liberty Steel produces

71%¹

of its reinforcing products using Polymer Injection Technology which is recognised by the Green Building Council of Australia as an Energy Reducing Process²

MEMBER OF

1. Average annualised figure for Green Star™ Rating Tool calculations
2. A lifecycle assessment of the Polymer Injection Technology (PIT) has been completed by the University of New South Wales and PE International and subsequently peer-reviewed by Life Cycle Strategies Pty Ltd. The Green Building Council of Australia has both these documents and recognises that PIT is an acceptable method of achieving their Energy Reducing Process requirement of 40MJ/tonne for the award of a credit point in the Green Star™ Rating Tool.
